Gigo Tree

Gigo Tree Product Tutorial

Long & Short Pegs can connect B Block and C Block system components.

2CM Cube Pegs can connect A Block and B Block system components.

Use the Peg Remover to remove connected parts.

Gigo Axle

AXLE I

Standard Axle, no ring, no marker.

AXLE II

Hard Stop Ring

Hard Stop Ring prevents over-tightening of gears and wheels so that friction does not interfere with movement.

AXLE III

Hard Stop Ring

Hard Stop Ring

Includes Hard Stop Ring, and a secondary Soft Stop Indicator showing the optimal spacing for gears and wheels that will reduce friction.

Lift Propeller

This propeller lifts the hovercraft up. Though the nozzle is narrow, it is very powerful.

Thrust Propeller

This propeller pushes the hovercraft forward. It produces a large airflow than the lift propeller, which provides the driving force to move forward.

Skirt

The skirt traps the air generated by the lift propeller to float the whole vehicle. Its flexibility allows it to trap the air on uneven surfaces, preventing the air from leaking out.
