Gigo Tree

Gigo Tree Product
Tutorial

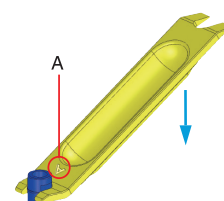

Long & Short Pegs
can connect B Block
and C Block system
components.

2CM Cube Pegs can
connect A Block and
B Block system
components.

Use the Peg Remover to
remove connected parts.

1+ A BLOCK-4CM BLOCK

7+ C BLOCK-1CM BLOCK

1+ E BLOCK-PANEL

6+ H BLOCK-SPRUE FRAME

3+ B BLOCK-2CM BLOCK

7+ D BLOCK-X GEO

7+ F BLOCK-ULTRA LIGHT

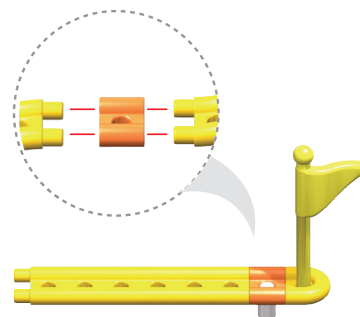

A BLOCK-4CM BLOCK-73 PCS

Total 670 pcs

BASIC

Used for all model construction, can be easily put together with connectors to develop creativity.

Gigo Axle

AXLE I

Standard Axle, no ring, no marker.

AXLE II

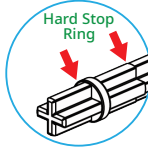

Hard Stop Ring

Hard Stop Ring prevents over-tightening of gears and wheels so that friction does not interfere with movement.

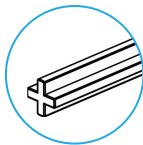

AXLE III

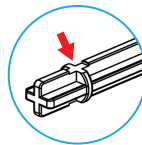

Hard Stop Ring

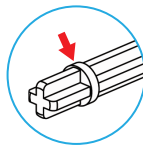

Includes Hard Stop Ring, and a secondary Soft Stop Indicator showing the optimal spacing for gears and wheels that will reduce friction.

Lift Propeller

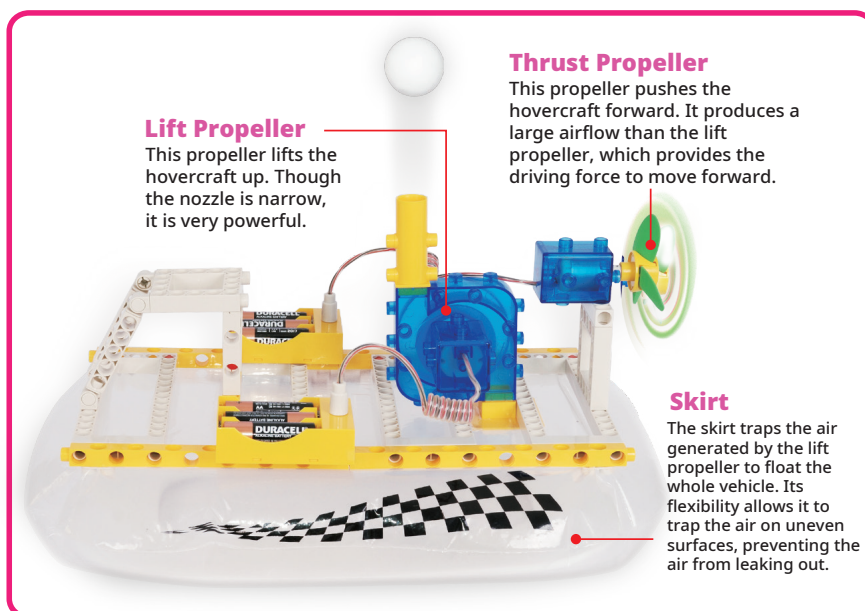

This propeller lifts the hovercraft up. Though the nozzle is narrow, it is very powerful.

Thrust Propeller

This propeller pushes the hovercraft forward. It produces a large airflow than the lift propeller, which provides the driving force to move forward.

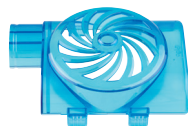

Skirt

The skirt traps the air generated by the lift propeller to float the whole vehicle. Its flexibility allows it to trap the air on uneven surfaces, preventing the air from leaking out.
